SYRINX PAPER PLANE for "POWERUP DART"

- Safe and stable flight possible.
- Continues ascending gently at full throttle, allowing continuous flight until the battery runs out.
- By slightly expanding the fuselage into a V shape, the overall rigidity is increased.
- To stabilize the flight, glue the fuselage with the wings slightly up. (Wing Dihedral)
- Do not fix the stabilizer. Fine-tune the position on the test flying.
- Lift the rear edge of the wings a little.
- A4 Cardboard (size: 100%)
